

SCHEDULE 5
Estimated Average Incremental Energy Costs &
Net Annual Avoided Capacity Cost

The Public Utility Policies Act (PURPA) requires that electric utilities must purchase power produced from Qualifying Facilities (QF's) at their avoided cost.

Meeker Cooperative reaffirms and designates that its avoided cost shall be Basin Electric's avoided cost.

To be eligible for the following rate, the QF must comply with all applicable laws and regulations as well as any requirements of Basin Electric, East River Electric, or the East River member system.

For generation 150 kW and greater, the purchase obligations have been transferred to Basin Electric, and the terms and conditions of the Basin Electric PURPA Policy apply.

For a QF with a capacity rating up to 150 kW, East River or Meeker Cooperative's PURPA avoided cost rate is as follows:

$$(\text{Basin PURPA rate}) \times (\text{loss adjustments})$$

The loss adjustments will be determined on a case-by-case basis.

The avoided cost rate will be updated periodically and is subject to change on an annual or more frequent basis.

Cooperative shall pay the member for all energy delivered as follows:

On Peak Energy Payment (\$/kWh)	\$ 0.01570
Off Peak Energy Payment (\$/kWh)	\$ 0.01570
Capacity Payment for Firm Power (\$/kWh)	\$ 0.00
