

# Energy Management offers you the best choice

**1** **Heat pump systems** provide all your space heating and air conditioning needs in one highly efficient, economical system.

- Rebate available

**2** **Cycled air conditioning** keeps you comfortable. Save by allowing your air conditioner to be cycled “On” and “Off” during peak periods.

- Rebate available

**3** **Electric storage space heating** makes any room nice and warm with all the comfort of a fireplace. Storage heating is supplied with electricity overnight, which is released the next day as heat for your home.

- Rebate available

**4** **Storage water heating** supplies your electric water heater with electricity overnight to heat your water for the next day.

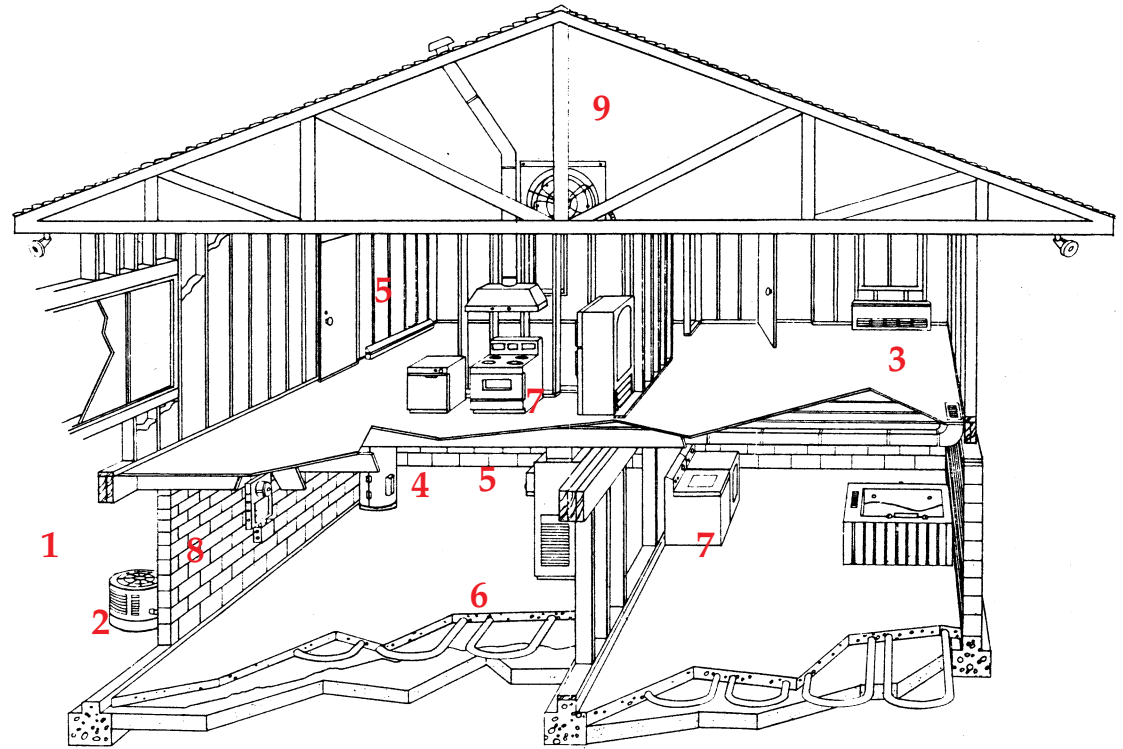

- Rebate available

**5** **Dual fuel space heating** uses electricity for space heating except during peak periods, when an alternate source, such as storage space heating or fossil fuel, is used.

- Rebate available

**6** **Warm floors** use electric cable or electric boilers to gently heat floors and keep your feet warm and toasty during cold winters at a low cost!

- Rebate available

*Electricity — From outside to inside, floor to ceiling*

**ENERGY STAR® appliances** in the kitchen and laundry room operate efficiently and cleanly with no combustible fuel or pilot light to worry about. Call our Energy Experts for rebate info.

**Heat exchangers** allow you and your home to breathe easier. Fresh air is provided by a balanced system that exhausts stale air while recovering the heat before it leaves your home.

**Attic ventilation or whole-house fan** helps you stay cool in the summer with limited need for air conditioning.

*Meeker Cooperative members can apply for Energy Management Improvement Loans when purchasing and installing Storage Water Heating, Dual Fuel, Storage Heat, Heat pumps and other Energy Management Improvements.*

*Contact the Energy Experts at Meeker Cooperative, 320-693-3231 or 800-232-6257 to learn more about these loans.*
